

### Product Summary

The GESDBH3V3AE1 is designed to protect voltage sensitive electronic components from ESD and other transients. Excellent clamping capability, low leakage, low capacitance, and fast response time, make these parts ideal for ESD protection on designs where board space is at a premium. Because of its small size, it is suited for use in digital cameras, cellular phones, MP3 players and many other portable applications where board space is at a premium.

### Feature

- Low reverse stand-off voltage: 3.3V Max.
- Low reverse clamping voltage
- Low leakage current
- Fast response time
- ESD Rating of Class 3(>16KV) Per Human Body Model
- IEC 61000-4-2 Level 4 ESD protection
